Contents

Welcome to Issue 201

Highlights

08  Get ready for Wi-Fi 7
Richard Swinburne looks at the latest Wi-Fi tech developments, from 30Gbps speeds to seamless meshes.

10  Cancelled
With gaming shows being cancelled in the wake of COVID-19, Tracy King questions the future of big gaming showcases.

16  64 cores
We take a look at AMD’s ultimate desktop CPU, the Threadripper 3990X.

24  £299 mini-ITX case
That seems like a lot of money, but NZXT’s H1 also comes with a PSU and liquid-cooling system. We find out if it’s worth the cash.

42  Affordable gaming keyboards
Want to get yourself a decent gaming keyboard, but don’t want to spend hundreds of pounds? We test eight models that cost under £70.

52  27in gaming monitors
We test some of the fresh new crop of high-quality 27in IPS gaming monitors that have recently appeared on the market.

76  Build a £993 gaming PC
We’re really pleased with the spec of this month’s build feature. For under £1,000, you can construct a system with a GeForce RTX 2060 Super, a 3rd-gen Ryzen CPU with liquid cooling, 16GB of RGB memory and an NVMe SSD. Find out what you need and how it’s done.

100  Why I still love mini-ITX
Antony Leather has just moved to a new house with lots more space than his old one, but he’s still planning to stick to mini PCs.

102  Spray-paint your motherboard
We show you how to make your motherboard match the rest of your PC’s colour scheme, covering how to paint the PCB, as well as details such as heatsinks.

94  Hobby tech
Gareth Halfacree looks at the Mooltipass BLE and tries some thermal imaging with the FLIR ETS320.

107  Retro tech: Athlon 64
K.G. Orphanides looks back to the release of AMD’s killer processor lineup at the end of 2003, which introduced 64-bit instructions to the x86 desktop PC for the first time, and gave Intel’s NetBurst chips a good kicking.
GAMING PC

BUILD A 27in IPS GAMING MONITORS ON TEST, FROM £199
