Contents

**SPARK**
06 Top Projects
What’s impressed us this month
16 Objet 3d’art
3D-printing: lasers good, will save the rainforest
18 Meet the Maker: Kim Freeburn
Creator of accessible robotics company, PiBorg
22 Columns
On the mutable magic of FPGAs
24 Letters
Your requests, rants, and recommendations
26 Kickstarting
Connect PC devices to your desktop computer
28 Hackspace
Geekspace Gwinnett
Gawking out in Georgia (USA)

**LENS**
33 What 3D printer?
All the knowledge you need to choose your next replicator
50 How I Made: Glass kim controller
Monitor the temperature of modern glass
56 In the workshop: Gold repair
We try the ancient Japanese art of Kintsugi
60 Interview: Chan’nel Vestergaard
How one self-taught maker is bringing science to the masses
68 Improvisor’s Toolbox
Hair-dryers
What fun we can have with hot air and a fan

**FORGE**
73 Tutorial
Build a baby monitor
90 Big Brother is watching you

**FIELD TEST**
114 Direct from Shenzhen
USB power adapter
Turn a puny 5 V into 30 V with this affordable doohickey
116 Best of Breed
Our favourite learn-to-solder kits
122 Can I Hack It?
Get under the hood of a kids’ electronics kit
124 Review
Gas-powered soldering iron
Take hardware hacking on the road with this portable tool
126 Review
Let’s Start Coding
An accessible way into learning microcontrollers
128 Review
All About Circuits: Tools
Outsource your electronics calculations with this excellent website

**INTERVIEW**
60 From self-taught Arduino tinkerer, to visiting MIT fellow, via shoes made from pineapple

**COVER FEATURE**
34 WHAT 3D PRINTER?
Discover the results of the first in-depth community 3D printing survey

Some of the tools and techniques shown in HackSpace Magazine are dangerous unless used with skill, experience and appropriate personal protective equipment. While we attempt to guide the reader, ultimately you are responsible for your own safety and understanding the limits of yourself and your equipment. HackSpace Magazine is intended for an adult audience and some projects may be dangerous for children. Raspberry Pi Trading Ltd does not accept responsibility for any injury, damage or equipment or for instructions or suggestions in HackSpace Magazine. Laws and regulations covering many of the topics in HackSpace Magazine are different between countries, and are always subject to change. You are responsible for understanding the requirements in your jurisdiction and ensuring that you comply with them. Some manufacturers place limits on the use of their hardware which some projects or suggestions in HackSpace Magazine may go beyond. It is your responsibility to understand the manufacturer’s limits.
